

Features that Set the Best Bankruptcy Software for Attorneys Apart

Monday, February 11, 2019

With each practice area comes a particular set of needs. The best practice management software [both anticipate and address these needs before the absence of a solution is felt by attorneys](#). When practicing bankruptcy law, legal professionals often interact with clients who are at their most vulnerable, and every case is critical. In this situation, automation solutions cannot drop the ball on what matters most: making work and life easy for attorneys. Read on to examine the features and integrations that elevate practice management solutions to optimized leading bankruptcy software for attorneys.

Efficient Client Intake

Those in need of bankruptcy-related legal services are likely facing a dire time in their lives, meaning that an attorney's efficiency in following up is a defining factor in whether a prospect becomes a client. Because of this, the best bankruptcy software for attorneys is one that will make the client intake process as efficient as possible. Look for a platform that offers custom intake forms that can be populated onto your firm's website. Once a prospective client fills out this form, a new contact should be created in the software, and the relevant attorney should receive a text notification to follow up with the client immediately. By offering this feature, [software optimizes a firm's first impression on its clients with minimal effort](#).

Diligent Notifications

A bankruptcy attorney's schedule is varied, and being on-the-go is a reality of a legal entrepreneur's daily professional life. For this reason, the best bankruptcy software for attorneys brings pressing matters to the palm of its users' hands. Bankruptcy attorneys are advised to invest in software that will deliver text message reminders to follow up with clients, attend important meetings and events, and submit documents before their relevant deadlines.

Optimal Integrations

The best bankruptcy software for attorneys will connect to the best platforms providing bankruptcy-specific automation services to their users. When looking for practice management software, look for options that integrate with platforms like Jubilee by LegalPRO, which offers filing and case management functionalities for bankruptcy attorneys. When combined with a practice management solution, Jubilee becomes part of a comprehensive automation arsenal poised to optimize the workflow of any bankruptcy attorney.

Best Bankruptcy Software for Attorneys

Though various software are geared toward making the lives of attorneys easier, few possess a set of key
