The Department of Homeland Security (DHS) announced that, because of new dire circumstances, TPS for Haiti will be designated for 18 months effective August 3, 2021, through February 3, 2023.

Eligible Haitians must have continuously resided in the United States since July 29, 2021, and have been continuously physically present since August 3, 2021. The 18-
month registration period will run until February 3, 2023.

Thousands of Haitians already have TPS-related documentation, including EADs, based on pending litigation. The DHS recommends all Haitians who meet the eligibility requirements apply as soon as possible for the new 18-month TPS period because the new designation provides more security. Failure to apply could result in possible gaps in status or employment authorization. Instructions on how to apply can be found in the Federal Register.
