Friday, March 2, 2018

On February 20, 2018, the [European Commission \(EC\) issued a notice of initiation of an expiry review of antidumping \(AD\) measures applicable to imports of U.S. bioethanol](#). The AD duty that has been in place since 2013 was set to expire on February 23, 2018. The European Renewable Ethanol Association (e-PURE) petitioned the EC on behalf of producers representing more than 25 percent of the total European Union (EU) bioethanol production to review the AD measures due to the likely recurrence of injury to the EU industry. E-Pure alleged that the removal of injury was the result of the existence of the AD measures and that an increase of imports at dumped prices from the U.S. would likely lead to a recurrence of injury to the EU industry should the measures be allowed to lapse. Following its determination that sufficient evidence exists to justify an expiry review, the EC will investigate whether the removal of the AD measures will likely lead to a continuation or recurrence of dumping of U.S. bioethanol. The investigation will conclude within 15 months.
