The Centers for Medicare and Medicaid Services (“CMS”) issued on April 2, 2018, an advanced copy of the final rule titled “Medicare Program; Contract Year 2019 Policy and Technical Changes to the Medicare Advantage, Medicare Cost Plan, Medicare Fee-for-Service, the Medicare Prescription Drug Benefit Programs, and the PACE Program” (“Final Rule”). This Final Rule will be published in the April 16, 2018 issue of the Federal Register.

This Final Rule implements provisions of the proposed rule that CMS released titled “Medicare Program; Contract Year 2019 Policy and Technical Changes to the Medicare Advantage, Medicare Cost Plan, Medicare Fee-for-Service, the Medicare Prescription Drug Benefit Programs, and the PACE Program” (“Proposed Rule”), which was published in the Federal Register on November 28, 2017.

Upon review of over 1,600 comments, CMS finalized many of the provisions as proposed or with minor revisions, deferred addressing some proposals until a later date, or opted not to finalize some provisions as proposed in the Proposed Rule.

We have summarized major provisions of the Proposed Rule in a three part Client Alert which EBG published earlier this year. For the provisions summarized in our Client Alert, the following chart reflects CMS’s actions in the Final Rule:

CMS is not finalizing its proposed revision to the definition of generic drug. Instead, CMS is finalizing a different approach by modifying language at 42 § 423.782(a)(2)(iii)(A) and § 423.782(b)(2), to achieve the same desired goal of setting the copay amounts for biosimilars and interchangeable products to those of generics.
